

BIOCASE™

FOR iPhone® 4S & 4

**BIODEGRADABLE
COMPOSTABLE**

MADE IN USA 

The compostable and biodegradable Nite Ize® BioCase™ protects your iPhone® 4S and 4, respects the environment, and makes a colorful personal statement all at the same time.

Made in the USA of GD P.U.R.E. Bio Resin (GDH-B1)—the world's first certified compostable elastomer — the Nite Ize® BioCase™ is a uniquely sustainable solution to protect your iPhone® 4S and 4. Soft and flexible yet surprisingly durable, the BioCase™ is made of organic materials, not fossil fuels creating a much lighter carbon footprint. The BioCase™ fits snugly around your iPhone®, slides in and out of your pocket easily, and comes in a variety of solid colors and designs that reflect a wide spectrum of styles and moods.

Wrapped in "anti-packaging," the BioCase™ comes in a simple sleeve made of 100% post-consumer recycled paperboard, printed with non-toxic ink using new dot technology that requires less ink than conventional printing methods. But perhaps best of all, the BioCase™ meets the strictest domestic and European standards of compostability and biodegradability. When consistently exposed to a composting environment it fully breaks down into organic compounds in a matter of months. It's the perfect plastic solution!

Feel good about choosing a sustainable, toxin-free, protective solution for your iPhone® that treats the planet with respect - choose the Nite Ize® BioCase™.
